

Silc Pig® Pigments

For Tin & Platinum Silicone Rubbers

Silc Pig® Silicone Pigments are used to add color to tin-cure and platinum-cure silicone rubbers. They are non-reactive dispersion fluids for RTV silicone applications. Silc Pig® pigments offer excellent dispersion and consistent color, but do not chemically bond with the silicone rubber and can settle out if pre-mixed ahead of use.

Silc Pig® pigments are very concentrated: a little goes a long way. Recommended loading range is .001% to 3% of total system weight. Do not overload silicone rubber with Silc Pig® or cure inhibition could occur.

WHITE Pantone White C	BLACK Pantone Black C	YELLOW Pantone 107C	BROWN Pantone 4625C

FLESH TONE Pantone 488C	GREEN Pantone 3292	RED Pantone Red C	BLUE Pantone 2757C	BLOOD Pantone 7421C

Smooth-On offers this color guide as a reference focal point only and assumes no responsibility for color accuracy or matching. Results will vary from one material to another. The end user is solely responsible for determining color suitability and accuracy. Small scale testing is recommended.
