

Buddy RhodesTM Stamp & Roller Release

Releases Texture Stamps from Fresh Concrete

Product Overview

Buddy Rhodes Stamp and Roller Release is a bubble gum scented solvent release agent that aids in texturing Buddy RhodesTM Vertical Mix by preventing the concrete sticking to texture stamps or rollers.

Benefits/Features

- Creates a good barrier between tools and concrete
- Evaporates and leaves behind no residue
- Economical
- Easy to use
- Pleasant bubble gum scent

Usage

While the mix is in the plastic state, Buddy Rhodes Vertical Mix can be easily stamped or textured.

Pour Stamp and Roller Release into a clean spray bottle or pump sprayer. Apply a fine mist of release directly to texture stamp or roller prior to pressing into the soft concrete surface. It can be used with both silicone and polyurethane stamps. Stamp and Roller Release may damage the spray mechanisms in some spray bottles. Test to ensure suitability.

Clean texture tools with dishwashing soap and water after use to prevent damage, especially to polyurethanes. Do not attempt to thin Buddy Rhodes Stamp and Roller Release with other materials.

Conditions

For best results store and use at 73°F/23°C

Safety First!

The Material Safety Data Sheet (SDS) for this or any Buddy Rhodes product should be read prior to use and is available upon request. All Buddy Rhodes products are safe to use if directions are read and followed carefully.

FLAMMABLE: Keep product away from flame and all ignition sources.

IMPORTANT - The information contained in this bulletin is considered accurate. However, no warranty is expressed or implied regarding the accuracy of the data, the results to be obtained from the use thereof, or that any such use will not infringe upon a patent. User shall determine the suitability of the product for the intended application and assume all risk and liability whatsoever in connection therewith.
